BOTOX BREAKTHROUGH

Medical Aesthetics @ Cluny has developed a non-surgical, no-downtime treatment to eliminate eye bags and dark circles.

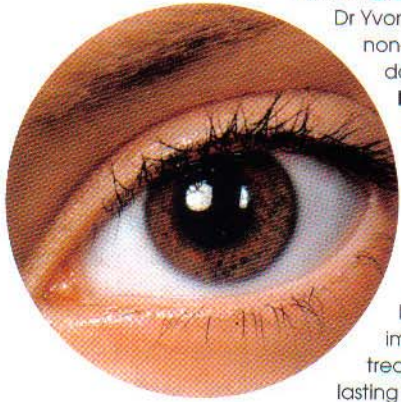

Eye Free

Medical Aesthetics @ Cluny has developed a non-surgical, no-downtime treatment to eliminate eye bags and dark circles.

BRIGHT EYES

Dr Yvonne Goh from Medical Aesthetics @ Cluny has developed a non-surgical, no-downtime treatment to eliminate eye bags and dark circles.

How it works This as-yet-unnamed treatment combines energies of fractional laser, radiofrequency and Infrared to treat eye bags. This gentle procedure stimulates collagen production by penetrating the deeper layer of the skin to initiate a collagen remodelling response, which enables skin to produce more collagen to repair and tighten skin. The treatment also uses IPL and radiofrequency to diminish prominent blood vessels so as to lighten dark circles.

How long it takes While skin around the eyes shows an immediate firming effect after one treatment, three to six treatments (only 15 minutes each) are normally recommended for lasting results. From \$133 to \$395 per treatment.

Exclusively available at Medical Aesthetics @ Cluny
